ELSEVIER

Journal of Molecular Liquids 61 (1994) vii

journal of MOLECULAR LIQUIDS

CONTENTS

Special issue: Teresa Fonseca Memorial Issue

Part I, Volume 60

Si Dolce Malia xi
Teresa Fonseca, Early Years xv
Scientific evolution of a researcher: Teresa Fonseca from talented student to original author ... xvii
Remembering Teresa Fonseca xxiii
Publications of Teresa Fonseca xxix
Solvation dynamics in methanol: solute and perturbation dependence
T. Fonseca and B.M. Ladanyi (Fort Collins, CO, USA) 1
Solvation dynamics in methanol: experimental and molecular dynamics simulation studies
S.J. Rosenthal, R. Jimenez, G.R. Fleming (Chicago, IL, USA), P.V. Kumar and M. Maroncelli (State College, PA, USA) 25
Molecular solvent-dynamical effects on activated electron-transfer kinetics: how important is solvent friction?
M.J. Weaver (West Lafayette, IN, USA) 57
Dynamics of inner- and outer-sphere electron transfer in a polar solvent
Y. Dakhnovskii (Santa Barbara, CA, USA) 73
A simple solvent model for electron transfer reactions
M. Cossi, M. Persico and J. Tomasi (Pisa, Italy) 87
Simulation of solvent isotope effects on aquous ferrous and ferric ions
C.L. Kneifel (Stony Brook, NY, USA), M.D. Newton (Upton, NY, USA) and H.L. Friedman (Stony Brook, NY, USA) 107
On the validity of Marcus relationship for dissociative electron transfer reactions in solution
V. Perez, J.M. Lluch and J. Bertràn (Barcelona, Spain) 147
Dynamics of twisted intramolecular charge transfer complexes in polar solvents
T. Fonseca (Fort Collins, CO, USA), H.J. Kim (Pittsburgh, PA, USA) and J.T. Hynes (Boulder, CO, USA) 161
Ultrafast experiments on intermolecular electron transfer in the benzene–bromine atom charge transfer complex
R.E. Schlief, W. Jarzeba, K.A.M. Thakur, J.C. Alfano, A.E. Johnson and P.F. Barbara (Minneapolis, MN, USA) 201
Effects of long-range interactions on the dynamics of ions in aqueous solution
G.S. Del Buono, T.S. Cohen and P.J. Rossky (Austin, TX, USA) 221
Light metal ions in water: Quantal and classical simulations for $^{7}Li^{+}$
J.P. Prates Ramalho, N.D.S. Cordeiro and J.A.N.F. Gomes (Porto, Portugal) 237
Reaction dynamics for heavy particle charge transfer reactions in polar solvents and ion dielectric friction
A.M. Berezhkovskii and S.A. Dudko (Moscow, Russian Federation) 251
Ionic diffusion in dynamically-disordered materials: Motion on a renewing, percolative lattice
M.C. Lonergan, A. Nitzan and M.A. Ratner (Jerusalem, Israel) 269

Part II, Volume 61

Si Dolce Malia xi
Stability and acidity of salicylic acid roatmers in aqueous solution: A continuous model study
G. Alagona and C. Ghio (Pisa, Italy) 1
Quantum simulation study of proton-transfer reactions in solution: from a molecular to a stochastic description
H. Azzouz and D. Borgis (Paris, France) 17

Quantum effects on the solvent contribution to the activation free energy
M. Ferrario (S. Agata di Messina, Italy), D. Laria (Buenos Aires, Argentina), G. Ciccotti (Orsay, France) and R. Kapral (Toronto, Ont., Canada) 37
A primer for valence bond mixing and avoided crossing: general paradigms in chemical reactivity
S. Shaik (Jerusalem, Israel) 49
On the activation free energy of the $Cl^- + CH_3Cl$ S_N2 reaction in solution
J.R. Mathis (Boulder, CO, USA), R. Bianco and J.T. Hynes (Boulder, CO, USA) 81
Density functional for an electron system in a homogeneous dielectric environment
A.A. Kornyshev (Julich, Germany) and A.M. Kuznetsov (Moscow, Russian Federation) 103
Computer simulation of the molecular shape effect on liquid properties of chlorobutanes
C. Millot, J. Jadzyn and J.L. Rivail (Vandoeuvre-les-Nancy, France) 115
Comparisons between the reactivity of chlorine dioxide in the gas phase and water solution
V. Vaida, K. Goudjil (Boulder, CO, USA), J.D. Simon and B.N. Flanders (La Jolla, CA, USA) 133
Classical theory of ultrafast pump-probe spectroscopy: applications to I_2 photodissociation in Ar solution
R.M. Whitnell, K.R. Wilson, Y.J. Yan (La Jolla, CA, USA) and A.H. Zewail (Pasadena, CA, USA) 153
Intramolecular transfer of excitation energy in sequential oligopeptides carrying naphthalene and protoporphyrin chromophores
B. Pispisa, M. Venanzi, A. Palleschi and G. Zanotti (Rome, Italy) 167
Ground and singlet excited state configurations and dynamics of the oligothiophenes. Theoretical and experimental studies
J.L. Houben (Pisa, Italy), R. Cimiraglia (Ferrara, Italy), A. Carpita and M. Ciofalo (Pisa, Italy) 189
Polyelectrolyte chain dimensions
K. Krishnaswamy and M. Fixman (Fort Collins, CO, USA) 209
IR spectroscopic investigations of peculiar behaviour of 4,n-alkoxybenzoic acids in their mesomorphic state I. Non-aligned samples
M. Petrov, E. Anachkova, N. Kirov (Sofia, Bulgaria), H. Ratajczak and J. Baran (Wrocław, Poland) 221
